

False Choices, Policy Framing, and the Promise of “Big Data”

Presidential Address

November 8, 2013

Paul T. Decker, 2013 APPAM President;
President, Mathematica Policy Research

It All Starts with Data

“In God we trust; all others bring data.”

- W.E. Deming, Statistician

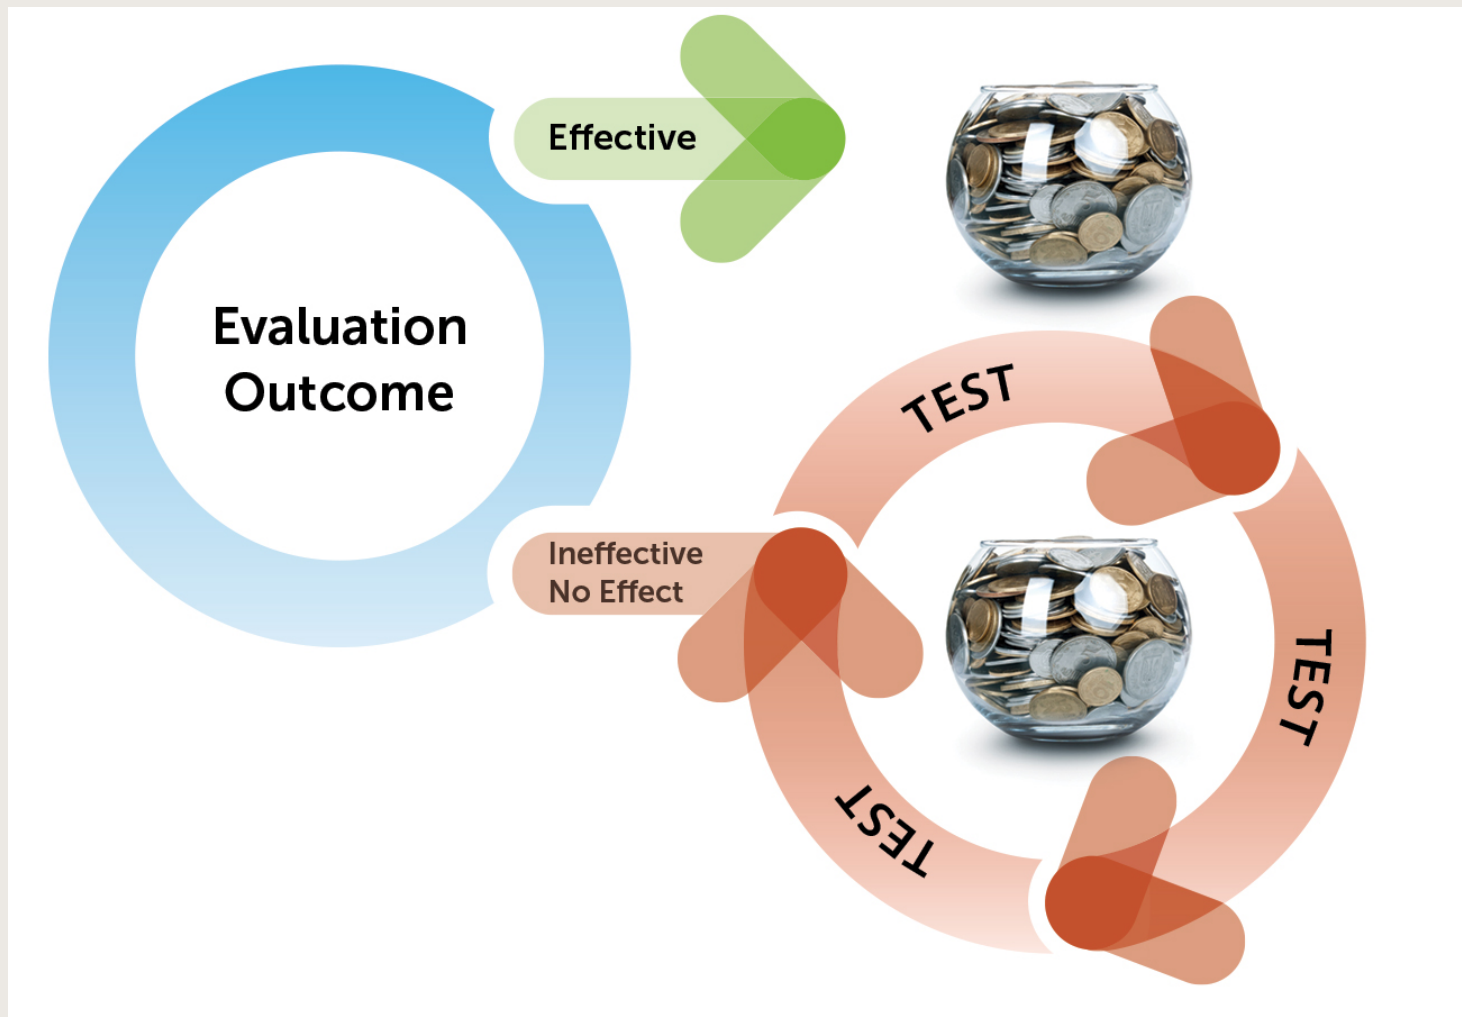

“Not everything of value can be measured.”

- *Wall Street Journal*, May 17, 2013

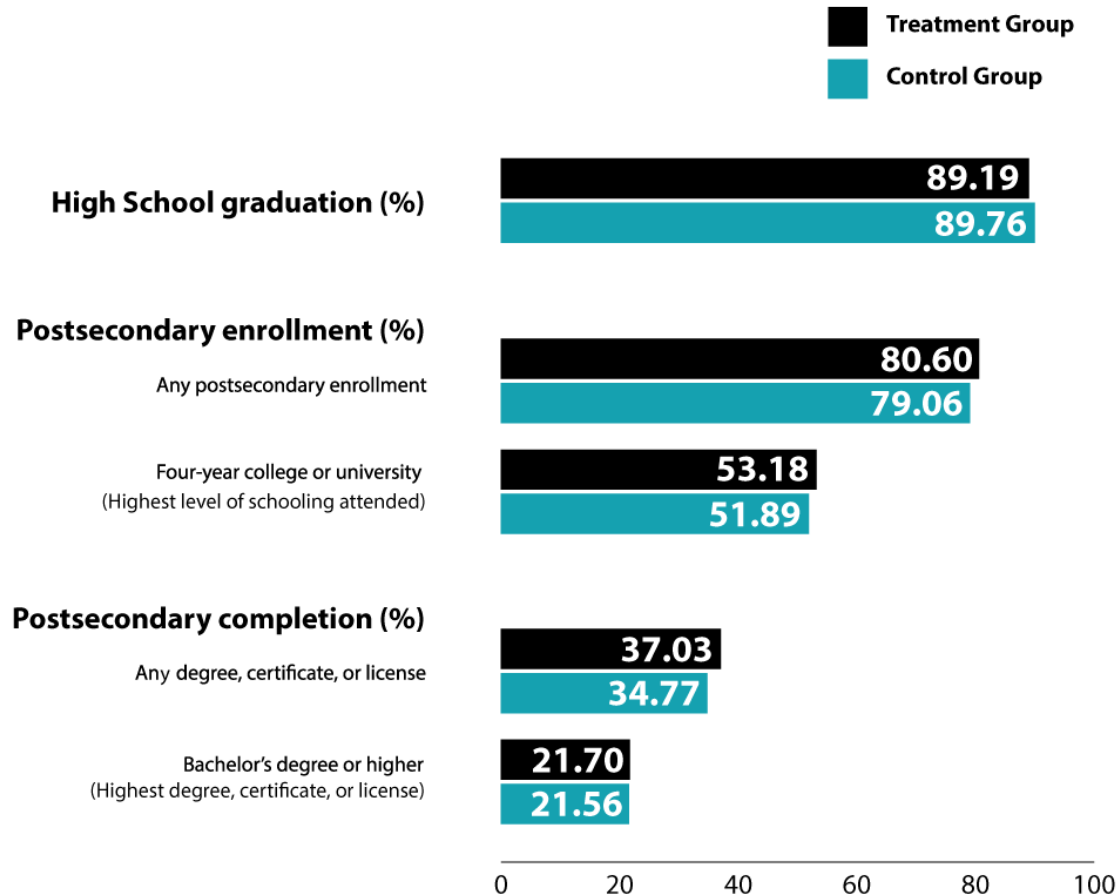

The False Choice Equation

The Nuanced Choice

Case in Point: Upward Bound

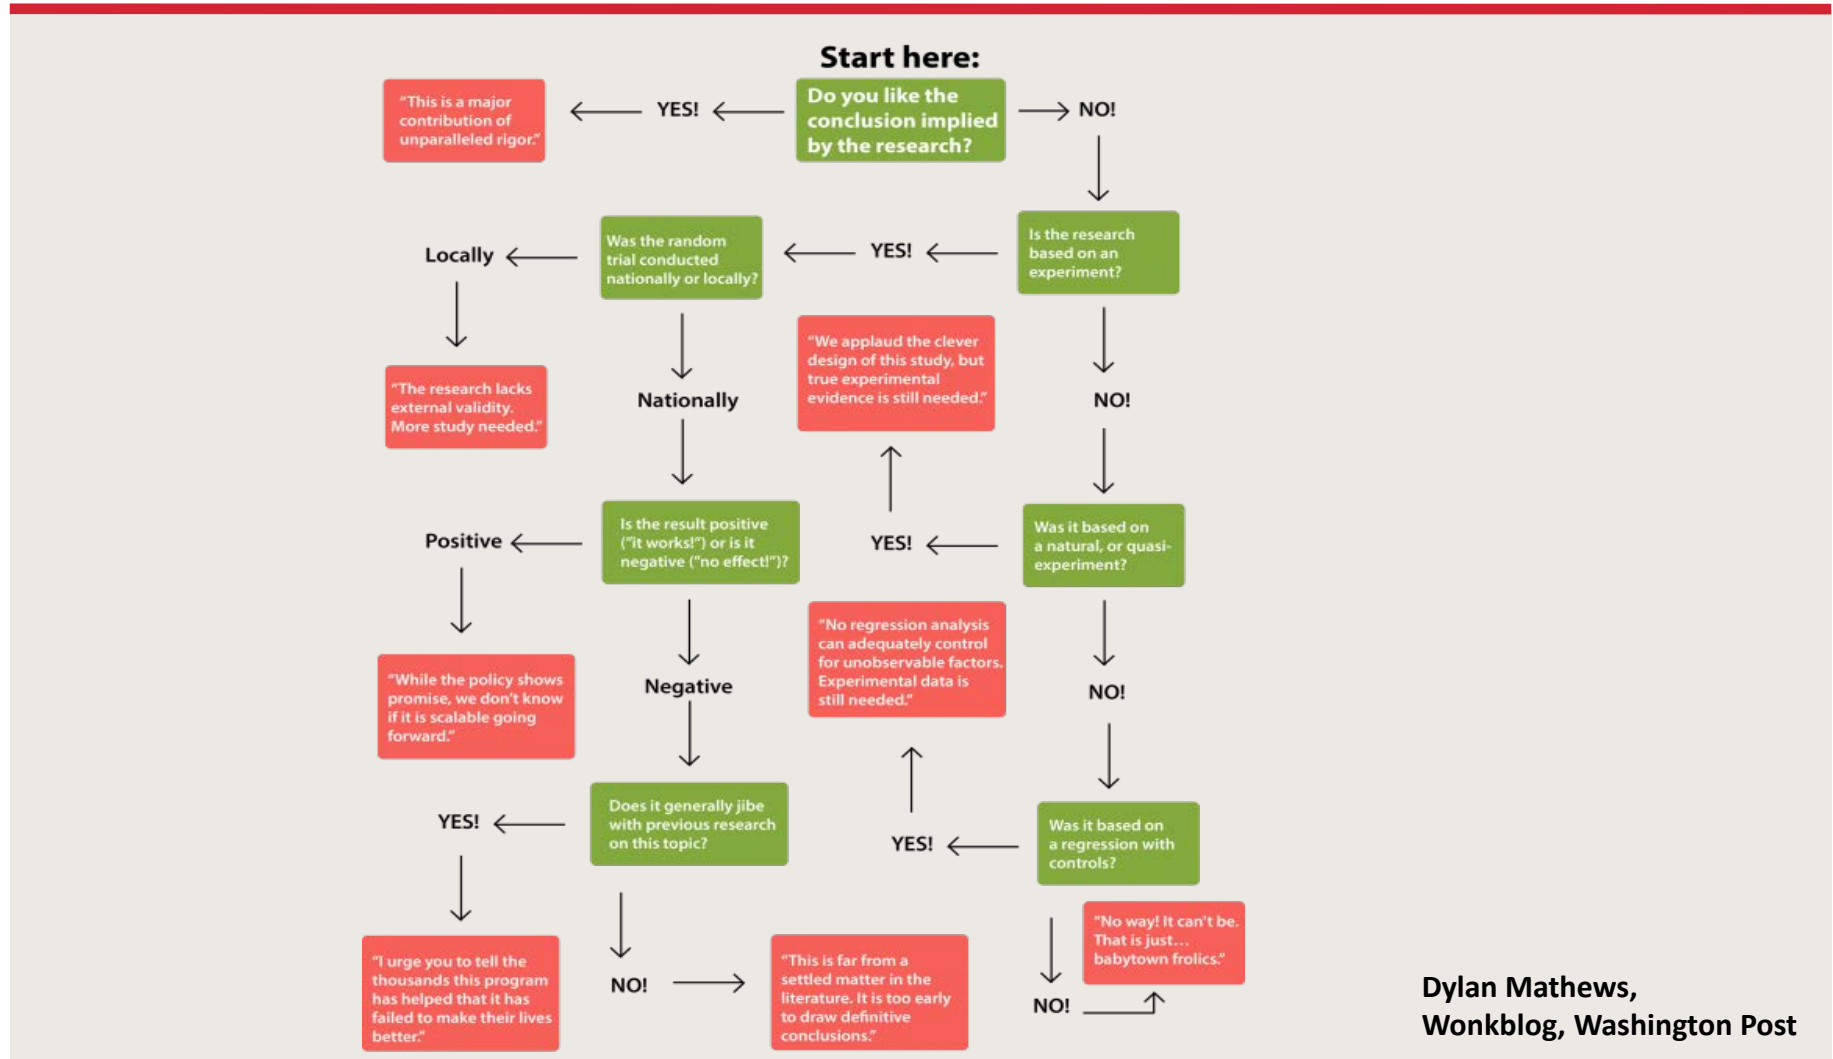

Advocates' Response

1.Cast doubt on findings

2.Work to prohibit further research

How to Argue with Research You Don't Like

Dylan Mathews,
Wonkblog, Washington Post

Advocates' Response

1. Cast doubt on findings
2. Work to prohibit further research

Felony

“You can’t tell a kid, ‘You’re going to be in this life-changing program,’ and then say, ‘no, you’re only going to be in a control group.’”

Education Week

“Random assignment is the wrong way to study their efforts because program operators typically **require students to undergo an elaborate application process as a way to show commitment and winnow out candidates unlikely to succeed.”**

Education Week

Spend More Time on Approaches

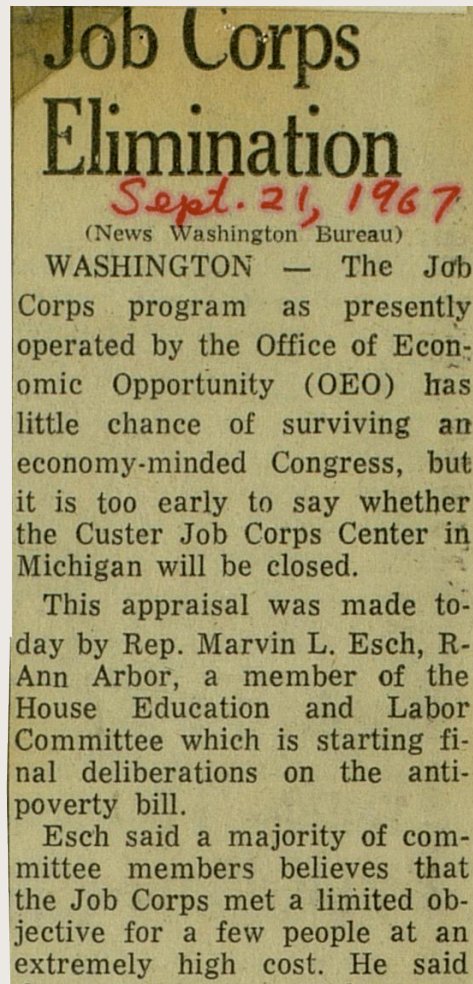

“If I had an hour to solve a problem I'd spend 55 minutes thinking about the problem and 5 minutes thinking about solutions.”

- Albert Einstein

Reframing the Evidence Conversation

- Stable commitment of resources
- Evidence is generated on a continual basis
- Research becomes an ally not a threat
- Programs evolve in their populations' best interest

Premature Obituary: Job Corps

Job Corps Earning Impacts

Average Earnings Per Week by Quarter
(1995 Dollars)

*Difference is statistically significant.

Paul's Policy and Practice Takeaways

1. Continue to support and generate evidence
2. Re-frame the evidence conversation beyond the binary choice
3. Don't be shy about connecting the dots

APPAM and “Big Data”

A Symbiotic Relationship With Technology

Disruptive Innovation Defined

“Technologies, processes or business models that bring to market products or services that are **more affordable and simpler to use** than what is currently available. It **enables more consumers** in that market to afford and/or have the skill to use the product or service. The change caused by such an innovation is so big that it **eventually replaces, or disrupts, the established approach** to providing that product or service.”

– Clayton Christensen

Teaching Yourself to Dunk at 5'5"

How So Netwoi Expla

“Less than \$1 out of every \$100 of government spending is backed by even the most basic evidence that the money is being spent wisely.”

Data Tsunami

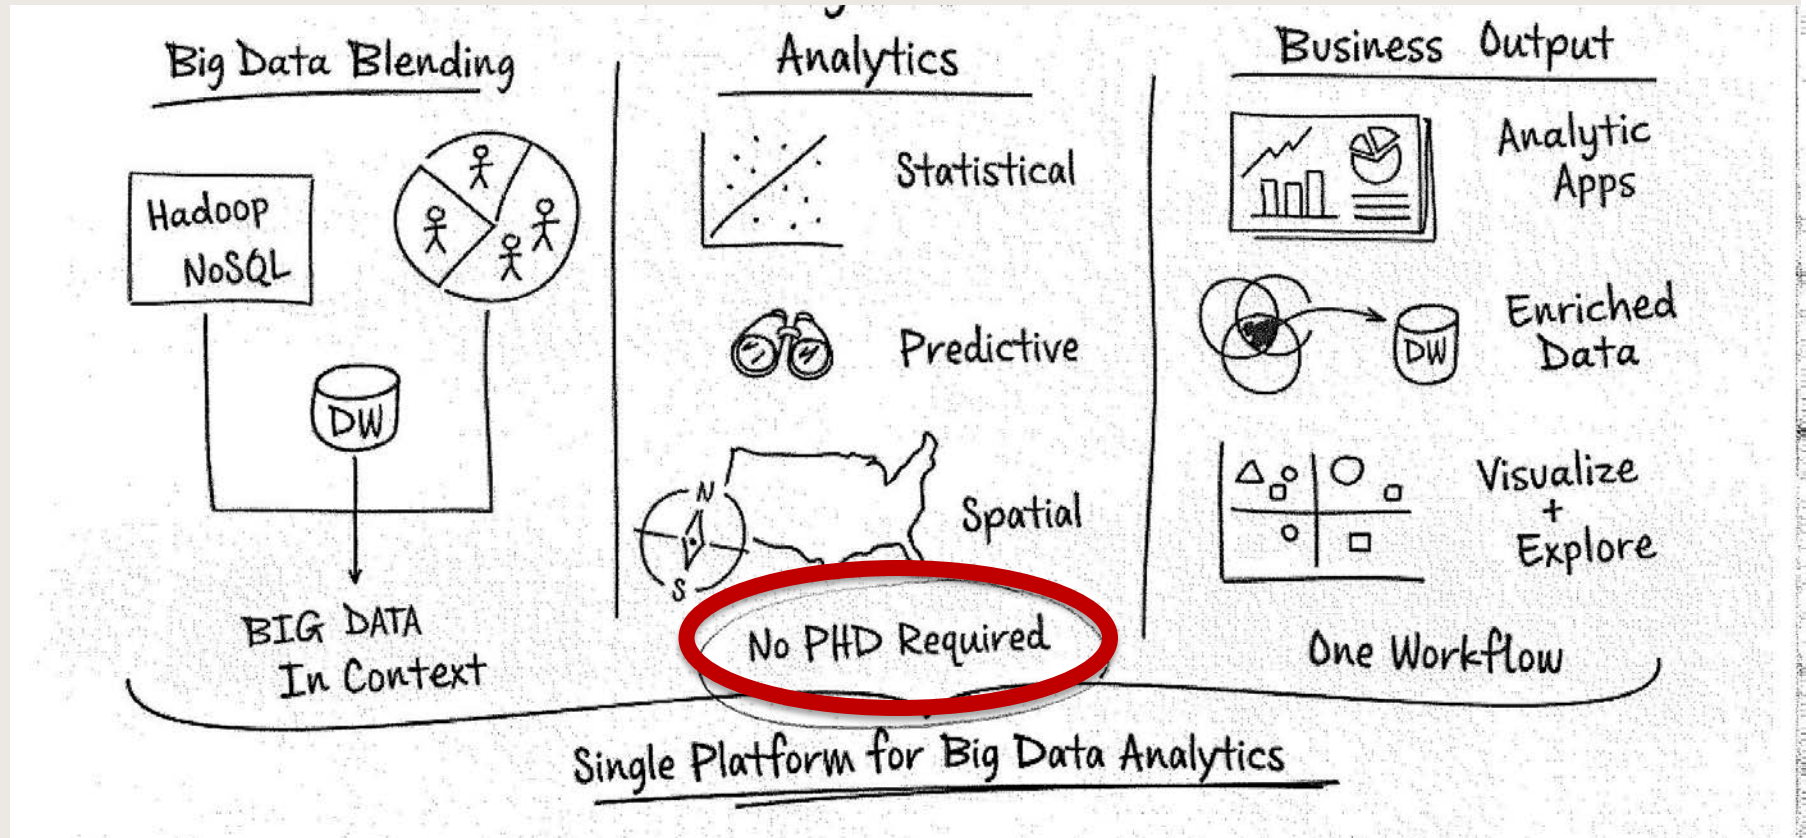

"Juking the Numbers"

APPAM's Sweet Spot

No Research Expertise Required

The APPAM Advantage

- Public management experience
- Methods expertise
- Policy analysis and evaluation
- Translation of data and research into practice

Democratization of Data

The screenshot shows the DATA.GOV website interface. At the top, there's a navigation bar with links: HOME, ABOUT, DATA, METRICS, OPEN GOVERNMENT, BLOGS, and COMMUNITIES. A search bar is present with the text "Search datasets...". Below the navigation bar is a "DATA CATALOG" section. The main content area is titled "Datasets" and includes a note about federal vs. non-federal data policies. A sidebar on the left allows filtering by location (with a map of North America) and by dataset type (with buttons for A-Z and 1-9). The main search results area shows "98,832 datasets found" (circled in red) and lists two datasets: "Monthly Price Change Estimates for U.S. and Census Divisions - Not Seasonally Adjusted" and "HUD Approved Housing Counseling Agencies". Both datasets are marked as "Federal" with a blue diagonal banner. The first dataset is also marked with an "XLS" icon.

DATA CATALOG

/ Datasets Organizations Interactive Datasets

Note that only datasets marked as "Federal" are subject to the U.S. Federal Government and Data.gov's Data Policy. Non-federal participants (e.g., universities, organizations, and tribal, state, and local governments) maintain their own data policies. It is important that users understand the data policies of participating entities in order to best utilize these datasets. A description of this catalog and information about the datasets presented and associated metrics is available [here](#)

Conclusion

- Commit to research and evidence, especially when it's inconsistent with our initial beliefs.
- We must remain nonpartisan and objective
- Realizing the full potential of “Big Data” is in our hands
- Ask the questions and set the framework, what gets asked gets answered.

Pythagoras

John Snow and the Broad Street Water Pump

- Seed a problematic field with research and trials
- Define clear and achievable goals
- Devise evidence-based strategies to get there
- Help guide society toward that sweet spot on the horizon
